                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         RESULT 34
PQ0662
outer capsid spike protein VP4 - feline rotavirus A (strain Cat2) (fragment)
NiAlternate names: VP8* protein
C;Species: feline rotavirus A
C;Species: feline rotavirus A
C;Species: feline rotavirus A
C;Accession: PQ0662

A, Title: Nucleotide sequence comparison of the VP8* gene of rotaviruses possessing the Al A; Reference number: PQ0651; MUID:93346985; PMID:8393919
A, Accession: PQ0660
A, POlecule + VP29: mRNA
A, Polecule + VP29: mRNA
A, Residues: 1-247 < NAK.>
A; Residues: 1-247 < NAK.>
C; Comment: This protein plays a role in viral neutralization, viral virulence and haemage
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Outer capsid spike protein VP4 - human rotavirus (strain PA151) (fragment)
NyAlternate names: VP8* protein
C;Species: human rotavirus
C;Species: human rotavirus
C;Date: human rotavirus
C;Date: human rotavirus
C;Date: human rotavirus
C;Accession: PQ0659

5374373
heat shock protein grpE - Synechocystis sp. (strain PCC 6803)
N/Alternate names: hypothetical protein sll0057
C;Species: Synechocystis sp.
G;Avriety: PCC 6803
C;Accession: S74373
Requence_revision 25-Apr-1997 #text_change 09-Jul-2004
C;Accession: S74373
Sato, S.; Kotani, H.; Tanaka, A.; Asamizu, E.; Nakamura, Y.; Miyajima, N.; O, W.; Okumura, S.; Shimpo, S.; Takeuchi, C.; Wada, T.; Watanabe, A.; Yamada, M.; Yasuda DNA Res. 3, 109-136, 1996
A;Title: Sequence analysis of the genome of the unicellular cyanobacterium Synechocystis
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 A;Cross-references: UNIPROT:Q59978; EMBL:D64001; GB:AB001339; NID:g1001102; PIDN:BAA1025

NiAlternate names: protein T31P16.220
Cispecies: Arabidopsis thaliana (mouse-ear cress)
Cibate: 02-Jun-2000 #sequence_revision 02-Jun-2000 #text_change 09-Jul-2004
CiAccession: T50027

No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.
                                                                                                                                                                             (without alignments)
